

Help us understand how heading a football affects the brain

THE UNIVERSITY of EDINBURGH
School of Engineering

We are looking for volunteers:

- Aged 18 and over;
- With previous football playing experience;
- In good health with no recent head injuries, including concussion or suspected concussion.

PARTICIPANTS NEEDED

to shape the future of head impact measurement in sport

If interested, scan the QR code or contact:
Thomas Aston (PhD researcher)
thomas.aston@ed.ac.uk

You will be asked to:

- Participate in a low-intensity football heading drill (12 headers over approx. 45 min period).
- Wear a set of motion capture markers for motion analysis;
- Be video recorded to support computer vision analysis.
